

Helping All College Students Succeed

Supporting Students with:

- Reading and Writing Difficulties
- Learning Disabilities such as Dyslexia
- English as a Second Language

Read&Write GOLD:

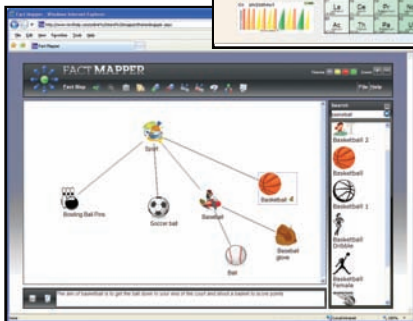

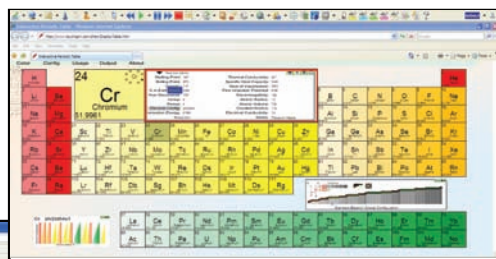

- Helps Students Transitioning into College
- Integrates with Mainstream Windows Applications
- Provides access to digital content, including inaccessible Flash and online applications (e.g. Blackboard)
- Designed as a True UDL Solution for all Students
- Empowers Students with Tools for Reading, Writing, Studying, and Research
- Increases Student's Confidence, Motivation, Independence, and Achievement
- Provides the skills necessary to succeed in the 21st Century

Read&Write GOLD, available for Windows and Mac, is the award-winning literacy software solution that allows struggling students to complete reading, writing, and research assignments as well as take tests independently.

This customizable easy to use toolbar seamlessly integrates with familiar applications including Microsoft® Word, Internet Explorer®, and Adobe® Reader, allowing students to access the support tools they need from within mainstream software programs. It highlights and reads text aloud using natural sounding voices and includes a comprehensive set of support tools.

Screenshot Reader - Select any text on the screen, even inaccessible flash, to be read aloud.

Online Fact Mapper - Graphically organize information on screen - perfect for visual learners.

Read&Write GOLD meets the needs of today's diverse student population and ensures that all students reach their potential and achieve success.

Multiple deployment and licensing options are available for on-campus and off campus use, including **unlimited school and home site licenses**. Read&Write GOLD can help all students everyday, in class and at home, by providing them the literacy support they need.

Also available on USB!
Read&Write GOLD MOBILE -
Access all of the features of
Read&Write GOLD anywhere,
anytime!

"Today I set up a student to use Texthelp and ModuMath together and really like the results. With Screenshot Reader, the student can click and drag the mouse over a part of the screen (as you would something on a picture to make a marquee of it) and Texthelp's Read&Write GOLD will do OCR on it. Right there in front of you! It's a very easy and intuitive process."

Susan Jones
Academic Development Specialist
Parkland College, Champaign, IL

-  **Text to Speech**
Reads text aloud, including websites and PDF Files, with dual highlighting using custom, natural sounding male and female voices developed especially for Texthelp. International voices are also available. Boosts reading comprehension and allows writers to listen to their written work.
-  **Screenshot Reader**
Users can access text that was previously unreadable - including text embedded within an image or contained within inaccessible Flash - and have the text read aloud with dual color highlighting. Users can also export the text selected with Screenshot Reader directly to Microsoft Word.
-  **Screen Masking**
Users can tint the screen using colors, like an overlay and mask areas of the window apart from the reading or typing area. This feature is helpful to users who have trouble focusing on the screen by masking out the active/non active parts of the screen.
-  **Online Translator**
One-click translator allows words to be translated into multiple languages and to be spoken aloud with highlighting - perfect for ESL students! Works with any digital content, on-screen selections, accessible applications, websites or digital textbooks.
-  **Phonetic Spell Checker**
Analyzes and corrects students' spelling and returns suggestions for common spelling errors. Phonetic spelling and flexible spelling errors, such as typing without vowels, are also identified. Corrected choices are displayed. Definitions for word choices are also displayed and a log collects student data.
-  **Homophone Checker**
Homophones are color coded and alternate choices are displayed - including their definitions. Teachers can also add homophones and confusables.
-  **Word Prediction**
Learns the writer's style and predicts the word they are typing and the word they want to use next. Increases accuracy while reducing key strokes. Based on phonetic flexible writing routines, Word Prediction returns more suggestions. Teachers can also create prediction dictionary files, tailoring prediction for the student and lesson.
-  **Talking Dictionary**
Quick access to a dictionary is essential to expanding vocabulary and reading comprehension. Enjoy a 180,000 word dictionary that speaks both the words and the definitions.
-  **Talking Calculator**
A simple/scientific talking calculator provides an audit trail of calculated equations.
-  **Fact Finder**
Students can retrieve online information in one step. Easily search for information on translation, dictionary, and general information websites.
-  **Fact Folder**
Stores and categorizes retrieved information, both text and images. The Fact Folder also automatically stores file sources and generates bibliographies.
-  **Online Fact Mapper**
Allows users to graphically organize information (including images) on screen - perfect for visual learners. Students can write text directly on the mapped elements, add sticky notes to the map, and export the elements into an outline.
-  **Study Skills Tools**
Facilitate active reading, writing, and learning. Students can highlight and extract text from any document or website to create study guides, outlines, or to complete assignments.
-  **Summary Feature**
Users can select all or any portion of text in a document or on the screen and create a new Word document that contains the text collapsed into a summary.
-  **Speech Maker**
Allows users to quickly and easily select any text and convert it into a sound file, such as MP3, using high-quality voices.
-  **Speech Input**
Converts speech to text to be read aloud.
-  **PDFaloud**
Dynamically speech enables any accessible Adobe Acrobat PDF file with dual highlighting directly through to the toolbar.
-  **NIMAS Conversion Tool**
The NIMAS Conversion Tool from CAST is distributed free of charge with Read&Write GOLD. Using NIMAS source files, accessible, student-ready versions can be created.
-  **Read MathML Files**
Use Read&Write GOLD and Design Science's tools, MathPlayer™ and MathType™, to create and read aloud MathML files containing even complex math equations.
-  **Read Dragon Recognized Text**
Read speech that has been converted to text by Dragon® NaturallySpeaking®.
-  **DAISY Reader**
Read DAISY books aloud with high-quality Texthelp voices.
-  **Scanning**
Scan print documents to be read aloud. Users can even scan documents in directly using a digital camera!

Resource Tools

Testmaker

Testmaker allows teachers to quickly create a new test or edit an existing test with multiple question types including Fill in the Blanks, Multiple Choice, Checkbox, True/False, and Short Answer or Essay. Teachers can save tests locally and then deliver them online. Students complete the online test and either save, print, or email the test to the teacher. Testmaker provides teachers with a whole-class solution for online testing.

PDF Accessibility Editor

PDF Accessibility Editor is used to set and control the precise reading order (speech output) of text and graphics contained in PDF files. This includes control over the finest of details, such as reading the caption for an illustration, correct pronunciation of math equations, and excluding headers/footers from the reading order.

Create Lexiflow eBooks

Provides the ability to convert a scanned PDF document to Flash and create a talking eBook, which can be viewed on any PC or Mac with Flash installed. In addition to text to speech with choice of reading voice, the eBook also includes support tools such as a Dictionary, Translator, Sticky Notes, and Highlighters. The eBook is ideal for distributing to students who have no accessibility software available.
